Web Development Internship Presentation Report

BY

Vashu Bhardwaj
(25SCS1003000968)

Internship Overview & Core Objectives

Primary Objective

Assisting in building, styling, and optimizing Sieve Capital's official company website

Transforming UI/UX wireframes into functional, production-ready frontend web pages

Core Objectives

→ Build fully responsive, mobile-first web pages using HTML5, CSS3, and React.js

→ Manage code quality using Git version control and collaborative pull requests

→ Implement styled UI components using Tailwind CSS for consistent brand design

→ Optimize website performance, loading speed, and image assets

Technical Toolkit

Languages

HTML5, CSS3, JavaScript
(ES6+)

Version Control

Git, GitHub (Branching & Code
Reviews)

Deployment

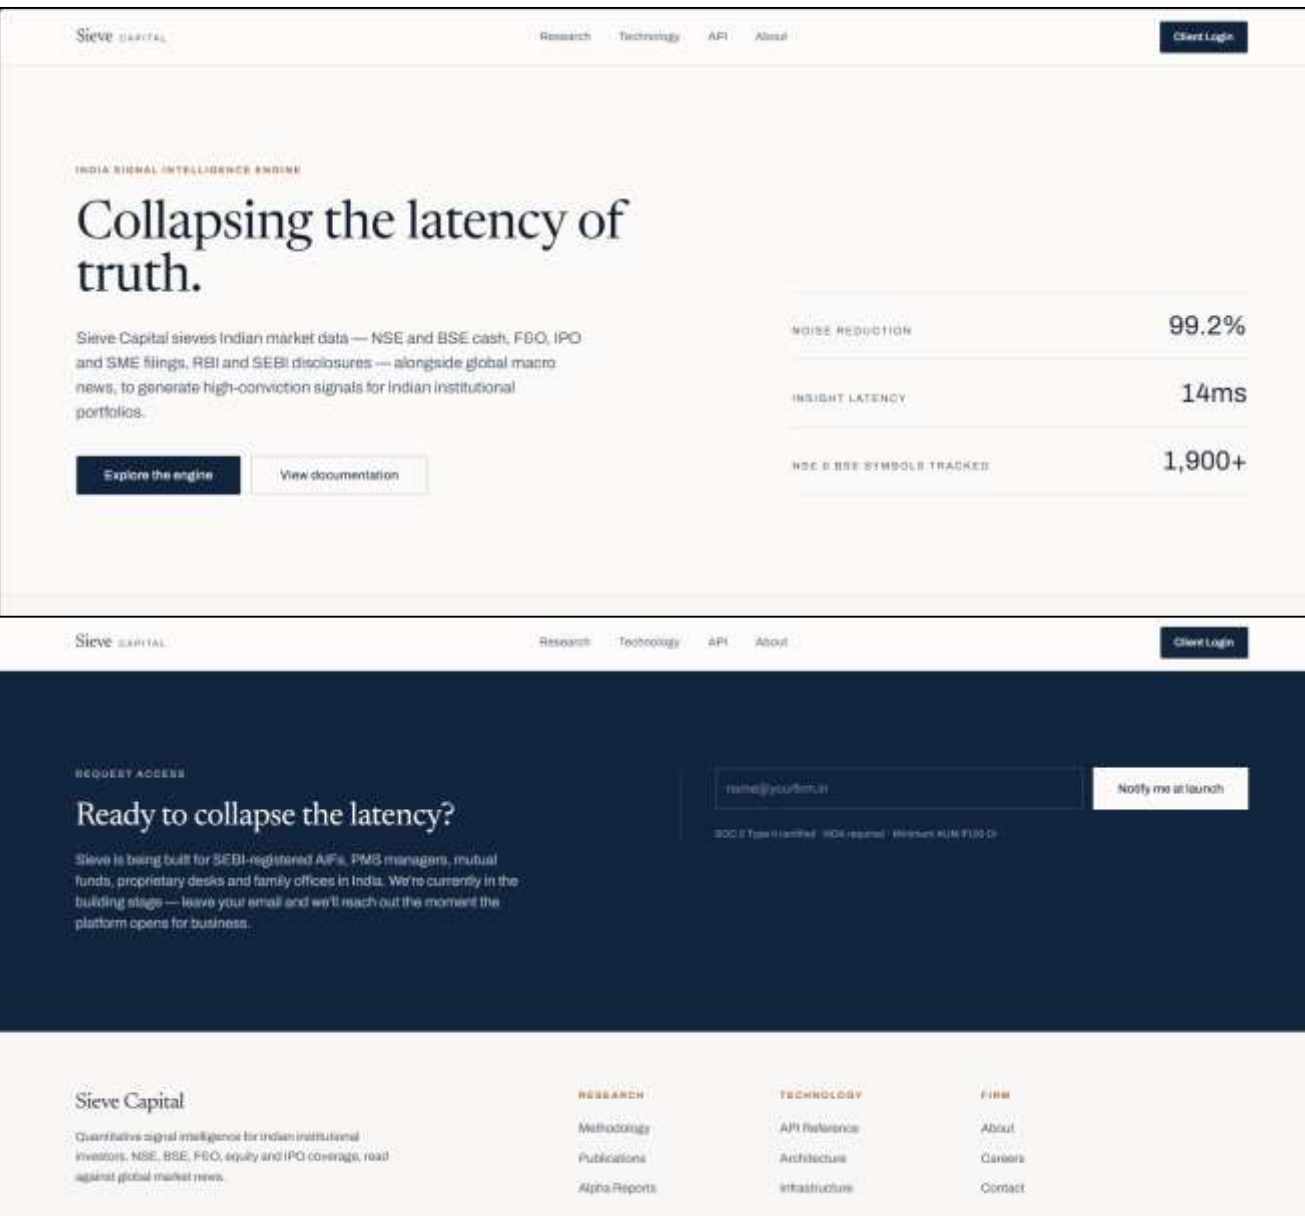

Vercel, Hostinger

Developer Tools

VS Code, Chrome DevTools, Figma (UI Design
Handoff)

Website Execution & UI Showcase

Execution Details

1 Landing Page UI

Built header navigation, responsive layout grids, and interactive action buttons

2 UI/UX Refinement

Translated Figma designs directly into component-based code

3 Bug Fixing & Optimization

Resolved layout shifts, optimized asset sizes, and fixed cross-browser issues

Outcomes & Technical Mastery

Responsive Design

Gained practical expertise in mobile-first development and adaptive layouts

Integrations

Integrated support and reach out pages for client discovery.

Industry Workflow

Learned real-world Git workflows, code reviews, and project timelines

Core Deliverable

Successfully assisted in completing the frontend build for Sieve Capital's website

Thank You
